

Getting Started with Linux

(the short version)

What is Linux?

“Linux” is a blanket term for any operating system that is based off of the Linux kernel.

This is Linus Torvalds.

What is a “kernel”

The central module of an operating system and it has complete control over everything that happens in the system.

DISTROS!

What are its advantages?

- It is free.
- No licensing or registration.
- Well maintained.
- Secure.
- Apps are easy to install.
- Damn. Fast.

How do I start?

1. Start slowly with apps.
2. Take it for a test spin.
3. Dual boot.
4. Go native (Mac Linux USB loader)

Ubuntu is a complete desktop Linux operating system, freely available with both community and professional support. The Ubuntu community is built on the ideas enshrined in the Ubuntu Manifesto: that software should be available free of charge, that software tools should be usable by people in their local language and despite any disabilities, and that people should have the freedom to customise and alter their software in whatever way they see fit. "Ubuntu" is an ancient African word, meaning "humanity to others". The Ubuntu distribution brings the spirit of Ubuntu to the software world.

Linux Mint is an Ubuntu-based distribution whose goal is to provide a more complete out-of-the-box experience by including browser plugins, media codecs, support for DVD playback, Java and other components. It also adds a custom desktop and menus, several unique configuration tools, and a web-based package installation interface. Linux Mint is compatible with Ubuntu software repositories.

- OS Type: [Linux](#)
- Based on: [Debian](#), [Ubuntu](#)
- Origin: [Canada](#)
- Architecture: [i386](#), [x86_64](#)
- Desktop: [Pantheon](#)
- Category: [Beginners](#), [Desktop](#), [Live Medium](#)
- Status: [Active](#)
- Popularity: [7 \(1,007 hits per day\)](#)

elementary OS is an Ubuntu-based desktop distribution. Some of its more interesting features include a new GTK+ and icon theme for GNOME, the Midori web browser, new applications developed in-house (e.g. Dexter, an address book and Postler, an email client), and Nautilus Elementary, a simple file manager.
